Project Progress Report 10 March 2025

Project Name: Water Tower/Rainwater Harvesting Structure

1) Project Objectives:

This project will:

- Provide a rainwater harvesting and distribution system to support the planting of both Coronation Copse, new tree planting and Community Orchard.

2) Progress against Plan:

Achievements this period:

- Completion of rainwater harvesting structure.
- Andrew Smith of Inkberrow Services employed for 3 days to carry out the construction
- Sides of structure clad with poplar wood, provided by two of lead volunteers
- Two IBCs donated by a local farmer to enable the water to be collected
- This project could not have been possible without the small team of loyal and dedicated volunteers who have come out in all weathers to get the job done!
- Signs have been attached to the outside of the structure – “Not drinking water” and “Caution – Do not climb!”

New Plan Activities:

- Provide watering cans to enable watering of copse and orchard trees in times of very little rainfall.

3) Actions for Next Period:

Planned actions for next period:

- Monitor

4) Risks and Issues:

- Pipes potentially not at correct angle to enable sufficient water flow, however this is thought to be minor issue.
